Invest in Transit for a Stronger New York.

Greater investment in public transit is a smart and easy way to grow jobs, strengthen the economy, protect the environment, and accelerate success in New York's classrooms and healthcare facilities. For many in our state, public transit equals independence and quality of life. For every \$1 invested in public transit, \$4 is generated in economic returns.

Public transit is transforming. People across the state want more from public transit systems than they can provide. Lawmakers face a critical choice – keep funding the same and leave customers waiting at the curb OR embrace change and be a champion for better mobility and access for the entire state.

By signing the petition, New Yorkers call upon Governor Andrew Cuomo and members of the New York State Legislature to increase public transit funding across New York State.
